You have to have some ETHER too

- In the Ethereum System, Ethereum is earning on each transaction that you make.
- You cannot transfer SPURT from one account to another without paying a bit of Ether to Ethereum.
- For that reason you need to buy Ether, also if you want to SELL your SPU+ to an exchanger.
- Below you are expected to buy some Ether. That can be only 10 Euro.
- You can also buy for 100 Euro and transfer to your whole downline just 5-10 USD or EURO (Remember, you will need to buy Ether to be able to buy SPURT Crypto, to have the right to get SPURT from your MySPURT.org account.)
- The reason one might do that is that you, this way, save transfer costs to Coinbase.
- HOW you work in Coinbase will be explained in another Tutorial

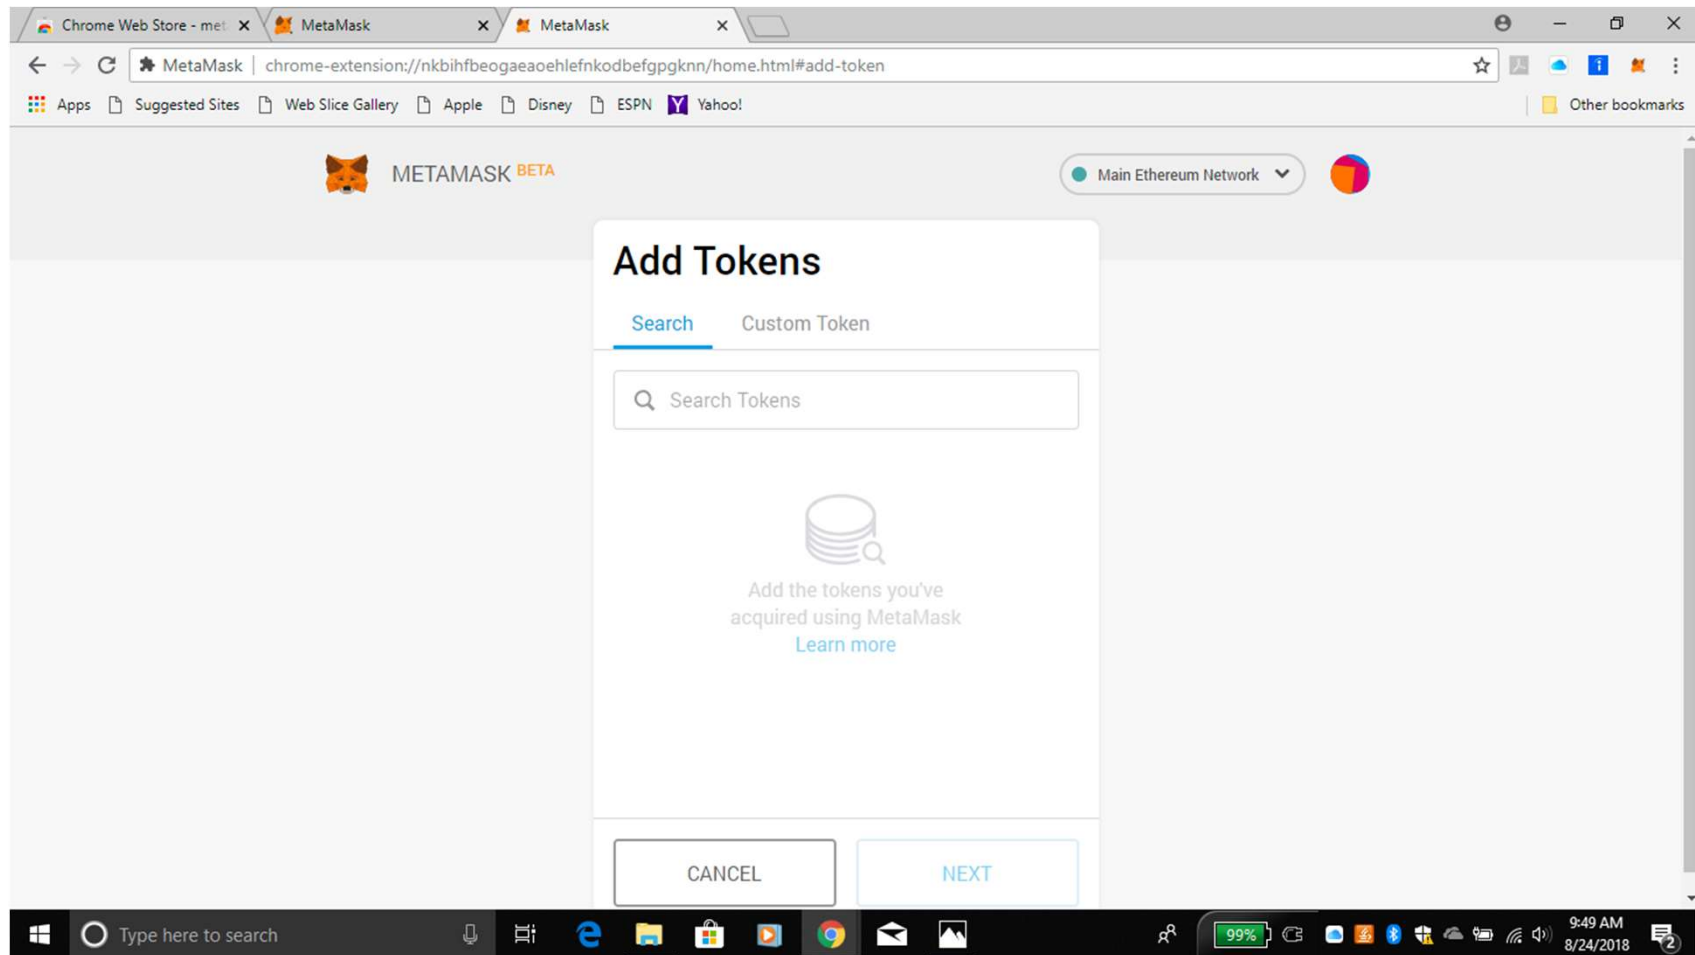

Deposit Ether (Ethereum) Follow the instructions on the option of your choice. Coinbase might be the easiest for beginners. You can use this link. <https://www.coinbase.com/join/5a676b438b9b6203ad3314c4>

Now you have created an account and you can add SPURT token symbol to your wallet. Click on Add Token.

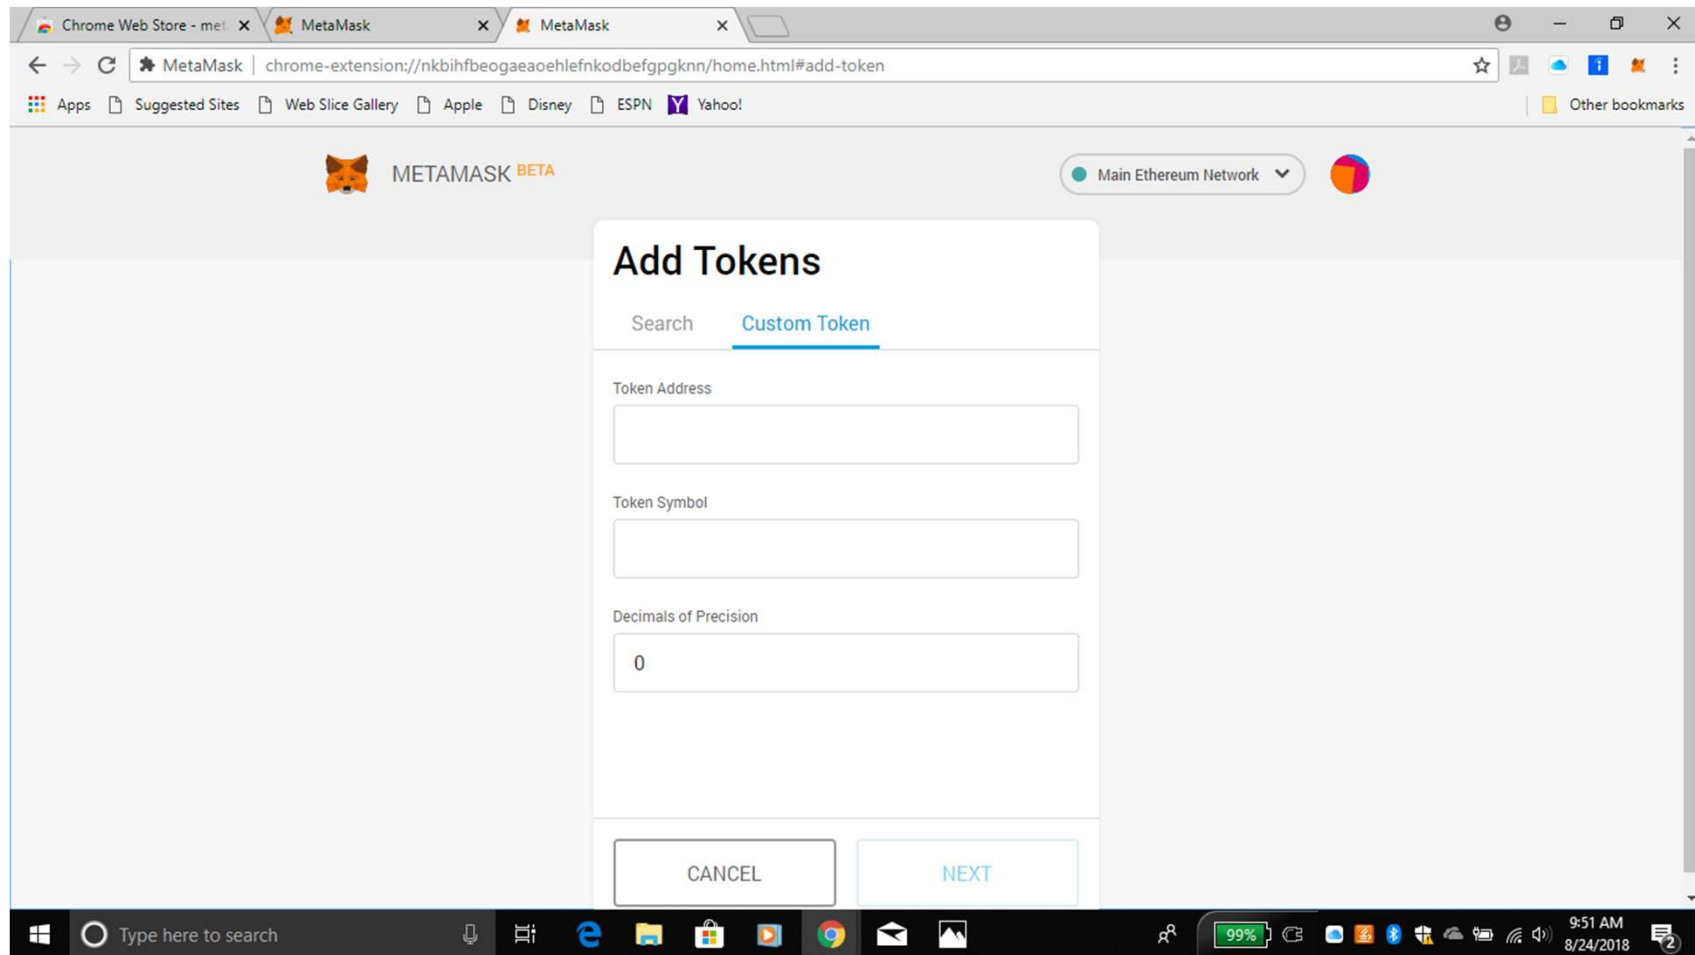

Click on Custom Token

Copy and Paste the SPU+ Token Contract Address in the box.

- Also complete the other steps, like the Sound Prosperity Membership and the Agreement.

Click on Details located below Account 1 to view your account address. You can also click on your Unique Account Image. You will see SPURT not SPU+

Caution!!!!!!

- BE CAREFUL WITH THE HANDLING OF THIS WALLET ADDRESS and only GIVE it to people who want to TRANSFER something to your account. Nobody can enter your account with this address only!
- NEVER pass on the Private Key to anyone, UNLESS you can trust that person 100%, which is less common as you think!!!!
- NO ONE needs to know YOUR SEED WORDS or your Private Key, but YOU do, because you could lose access to your account and your Seed Words or Private Key will allow you to recover your account.
- That is ALSO a reason that you might NOT want help of others by setting up this account.
- When others have your information, they have access to your money!
- When you cannot set up your Metamask-account yourself, you might also not be able to USE your SPURT, for many other steps will follow.
- The Seed Words to your Metamask account and the Private Key allows access through other means.

STEPS TO TAKE

- For you to get SPURT Crypto on your Metamask account, you have to sign an Agreement to provide your account information to Admin so that they know what your Crypto SPURT Address is.
- You will also have to sign a contract to guarantee that you respect the VALUE of SPURT
- This way we can keep SPURT stable and not, like for example Bitcoin, subject to speculation.
- We will provide information on exchange and on how to use Coinbase in different video's.

Link for Agreement for SPU+ <http://myspurt.org/spurt-,-crypto-spu/agreement-for-spu>. Your Metamask wallet address will need to be entered on this agreement.

How to handle your account.

- When you login to your account again, you will notice that your account disappears and is just small on the right hand side of the screen. When you click on the little square at the right hand top it will enlarge your screen AND STAY large during the time you work on it.
- For Problems you might experience, and you WILL experience them, please go to

<http://myspurt.org/information/tutorial/metamask-account>

Here you can also find how you can work with your account.

YOUR METAMASK ACCOUNT ALWAYS NEEDS TO BE OPEN WHEN YOU WANT TO EXCHANGE YOUR SPURT THEY ARE CONNECTED.

NOW PRINT THE DOCUMENT 3 TIMES! PLACE IT IN DIFFERENT LOCATIONS. SAVE this document also on your computer SO that YOU can find it, for it is easier to copy paste as to copy by hand all the information.

Thank you for setting up your Metamask account and join us on the Crypto SPURT journey!
