*We experienced that not all people can click on the Accept button with Metamask. Use any of the other browsers.

Firefox

We also experienced problems with Firefox. The little Fox from Metamask at the right-hand corner of the browser, did not show after we connected with Metamask. In case you do not see it in the symbol list, go to menu, adjust, you will see the little orange fox on your screen, right click and add to symbol list. Refresh the page.
